# AMG Oncology Coronavirus (COVID-19) Clinical Algorithm Telephone Screening

## Medical Office Associate or On Call Physician Telephone Screen

Do you have a fever or cough or shortness of breath?

**OR**

In the last 14 days have you:
- Traveled abroad?
- Been exposed to an individual who has traveled abroad?
- Been exposed to someone with laboratory confirmed COVID-19 infection or person under investigation (PUI) for COVID-19?

---

**YES**

To One or Both

Call is routed to Clinician to assess recent labs, past medical history, medication profile and treatment history.

Ask patient if they have symptoms and/or had exposure/travel risk.

Patient HAS symptoms, AND is immunosuppressed or suspicious of being immunosuppressed with or without exposure/travel risk in the 14 days prior to symptom onset

---

Patient has NO symptoms, AND is not immunosuppressed or suspicious of being immunosuppressed but HAS had exposure/travel risk in the last 14 days

---

**No**

To Both

You may stop screening for COVID-19:
- No identifiable Risk
- No actions needed
- Provide routine medical care
- Evaluate as with a sick call

---

**Clinician Triage (RN, Physician, NP) - Check for severity of symptoms and comorbid conditions**

### Symptoms:
- High fever above 100.0°F
- Severe shortness of breath
  - unable to finish sentences while speaking or unable to walk across a room
- Rapid breathing rate
- Wheezing
- Chest pain
- Nausea/vomiting
- Unable to tolerate oral liquids or decreased urination
- Lightheaded/dizzy when standing
- Confusion
- Severe headache or body aches or chills

### Non Immunosuppressed Patient

<table>
